2480 SERIES STATIONARY COMPUTER

The 2480 Series Stationary Terminal delivers timely, accurate data for mission critical manufacturing systems. With a compact metal case, environmental sealing and power protection, the reliable 248X handles the most punishing industrial plants. It's ideal for work in process tracking, labor collection, and time and attendance applications.

The 2480 Series Stationary Terminal includes two ports for bar code input devices and a serial port to connect a printer or scale. An optional integrated badge scanner, digital input/output and two additional serial ports accommodate the most demanding data collection requirements.

Choose Ethernet, wireless or serial connections to host computers. With the 2.4 GHz and 802.11b wireless models, you can easily change configurations of manufacturing work cells. The 2480 Series supports client/server and terminal emulation host environments. It's also compatible with Intermec CrossBar® networks.

The 2480 Series Stationary Terminal is programmable using industry standard, Microsoft® C/C++. Using standard tools you can dramatically reduce development time and cost for creating shop floor solutions.
