

Setting up Windows Mobile Device Center

1. Go to the Microsoft Downloads website at **<https://www.microsoft.com/en-us/download>**
2. Type "Windows Mobile Device Center 64 Bit" in the Search Bar and hit Enter
3. Click the option for **Microsoft Windows Mobile Device Center**. The version number may also be different from the one displayed in the picture below
4. Click the **Download** button
5. The file will then download. When it finishes downloading. Open the file to have it installed on your computer

Starting up Windows Mobile Device Center for the first time

1. Navigate to the Start Menu and click **Windows Mobile Device Center** in your programs list
2. Click **Accept** and finish installing

Connecting a device using Windows Mobile Device Center

1. Leave Windows Mobile Device Center open at this window

2. Connect your barcode reader to your computer, make sure it is turned on and has a battery in it

3. Wait for the Windows Mobile Device Center window to say **Connecting**, it may automatically be installing your barcode reader's drivers at this time

4. Your barcode reader is now connected with your computer when it shows **Connected** at this window
