

123 Asset Tracker

123 Asset Tracker consists of a portable barcode reader and simple-to-use software.

Overview

123 Asset Tracker is a simple asset tracking tool for use by any government agency or company. It allows users to quickly determine what assets they have and where these assets exist. Using a simple barcode reader, you can collect the asset's location, status and date and time of the audit. And since it is Excel-based there is no learning curve to overcome. It's simple to use and easy to understand.

Benefits

With 123 Asset Tracker you no longer need to use cumbersome manual methods of tracking assets. It can all be automated, saving you time and money! The scanning is very simple and the software is Excel based. The handheld barcode readers are small, light-weight and simple to use.

Benefits include:

- Fast Asset Inventories—find out what assets you have and where they exit.
- No complications—easy to use barcode readers and easy to use asset software.
- Simple Excel spreadsheet-based—makes it easy for viewing and use by other programs, databases or reporting tools.

Key Features

- Audit locations using barcodes.
- Excel-based driven for simplicity and ease of use.
- Find assets quickly and accurately. Discrepancies are easily noted and found.
- Advanced features include lookups, conditions, memo or status changes.

123 Asset Tracker Software Steps

- First, using the portable barcode reader, scan or enter in the location.
- Next, scan the barcode tags in that location. You can also enter a status or condition code.
- After scanning all barcodes in all known locations, you're almost finished with the audit.
- The barcode reader is placed in the communications dock which is connected to your PC through a USB cable and uploaded.
- Once the data is transferred to the PC, 123 Asset Tracker is used to complete the audit. All assets found during the inventory are matched up to their corresponding barcode tag # in the master table. Any discrepancies are noted.
- This allows you to see what assets were found, not found, added new and also which assets were moved or changed locations.

The Barcode Reader

123 Asset Tracker uses simple but powerful barcode readers to conduct audits. The simple prompts allow you to enter location, barcode and condition and many other features. It's easy to add more barcode readers as your asset inventory grows.
