

CN51 Vista Scanner Kit

Overview

The new CN51 Vista Scanner Kit features an extremely rugged data collection device that is easy to use and fully compatible with the VA's VISTA System. It comes with the following applications developed by MSS Software for AMES/MERS and GIP (Vista):

- PRCUS – Expendable Usage
- PRCPH – Expendable Physical Count
- ENNX – Non-Expendable
- ENPM – Preventative Maintenance

The VA has been successfully using this application software for many years, and the programs work seamlessly with the VA's VISTA System.

Rugged and Precise

The CN51 combines ruggedness with an integrated high-performance 1D/2D scanning capability. It uses a Microsoft Windows Embedded Handheld v6.5 operating system with a power-packed 1.5GHz dual core, multi-engine processor design with 1GB RAM, and 16GB Flash for the highest degree of future-proofing capability. This unit can withstand multiple 5-foot drops to concrete and is sealed against rain, dust and moisture (IP64). In addition, the backlit 43 key QWERTY keypad is wear-proof, and the touch panel glass is chemically strengthened for extra durability. This unit measures 6 1/2" x 3" x 1" (a little larger than an iPhone and three times thicker) and weighs about 12 oz.

Innovative Technology

The CN51 imager (EA30) has a "laser-like" aimer that delivers high speed, accurate 1D and 2D barcode reading in any orientation. The scanner can be set up as a single line imager or a regular 2D imager. The battery lasts a full 8 hour shift and powers a bright WVGA display that's easily viewed in full sunlight. It also provides quick and reliable data connectivity for uploading large amounts of data.

Key Features

- AMES/MERS and GIP Compatible (Vista)
- Seamless application portability
- Exceptional scanner imager and long-lasting battery life
- Lightweight and Large Display Screen

How to Order

The CN51 Vista Kit includes the mobile computer with preloaded MSS VISTA Software Programs, KWedge data transfer utilities and accessories.
