Attendance Tracker Pro (ATP)
Barcode Badge Attendance Tracking System

mss software
the right way to barcode

Overview

MSS Software's Attendance Tracker Pro (ATP) is a cloud-based attendance application that uses barcodes to track attendees in and out of classes, sessions or events. It can also be used for security or lead retrieval using simple barcode scanners to verify not only attendance but also to prevent unauthorized entry into these classes. Measuring attendance is a significant benefit of ATP and this information can used to gauge the effectiveness of your efforts in planning future events.

Attendance Tracker Pro uses economical data secure barcode readers to scan badges. It is also browser-based so that you can use it from anywhere. In addition to allowing attendees to register online, you can use the system to create barcode badges. Reports can be generated to show session attendance or absence, attendee check in/out times, continuing education credits or CEU's as well as many other reports. A certain amount of report customization can be done in order to tailor this to your needs.

Simple to Use

- Create a registration link for your event.
- Print badges via desktop or barcode badge printers.
- Scan attendee badges for each session or class.
- In and Out times can be collected for CEU credits
- Transfer barcode data to ATP.
- Generate attendance reports.

Attend Pro
