VA VistA
Small Label Printer (MPC43-1 / MPC43-2)

mss software
the right way to barcode

Overview

This small label printer has been specifically configured to print VistA labels just like the larger industrial printers currently in use at the VA. All VistA label information is represented on the label and can be scanned with existing scanners the same as the larger label printers. The advantage is that this printer is smaller and lightweight and can fit in smaller areas or moved easily. In addition, it comes in two flavors – Ethernet Ready or WiFi Ready.

The MPC43 Printer makes use of the versatile Intermec PC43 Printer using Smart Printing technology so that you can print small (1.5" x .5") VistA labels or the regular size VistA labels (3" x 1"). Simply assign an IP Address to the printer so it can work with VistA, then start printing. It's that easy.

Printer Specifications

The easy-to-use PC43 desktop printers feature a double-wall clamshell construction for long term durability. This printer was designed by users for quick set-up and trouble-free use. No longer are users required to decode a blinking LED to determine printer status. This printer comes with a universal Icon interface for immediate notifications reducing training and support needs.

One-hand drop-in media loading (and reloading) makes it highly intuitive. Best of all, the disinfectant resistant case means it's made to last in your environment. The one-inch

Key Features

- Prints small labels (1.5" x .5") or regular size labels (3" x 1")
- Plug and Play VistA compatible – No changes necessary
- Ethernet ready or WiFi Ready (choose Part #)
- Light-Weight and Portable
- Use for AMES/MERS or GIP

core accommodates the largest ribbon roll (up to 11,811 inches/300m) in a desktop printer reducing the need for frequent replacements helping to maximize uptime.

With a fast throughput at 8 ips, you can count on this printer to deliver a productivity advantage for your labeling needs. From a migration standpoint, the compact size and common media specifications results in an easy path from legacy Intermec printers such as the PM4i and is backwards compatible with the Intermec 3400 and 4420.

Finally, the printer is lightweight and does not take up much space. It fits in a space less than 9" and only weighs 6 lbs. So it is light enough and small enough to easily move around.

Optional: **VA VistA Printer Kit** is also available in WiFi to make connectively more mobile. This printer has all the same features as the Ethernet Ready unit except it has WiFi built-in and can be easily connected to existing WiFi networks. (Part # MPC43-2)

Product # MPC43-1 Ethernet VA VistA Label Printer
Product # MPC43-2 WiFi VA VistA Label Printer
