VA VistA
Scanner Kit (M010AA)

mss software
the right way to barcode

Overview

The new VistA Scanner Kit features an extremely rugged data collection device that is easy to use and fully compatible with the VA's VistA System. It comes with the following applications developed by MSS Software for AMES/MERS, and GIP.

- PRCUS – Expendable Usage
- PRCPH – Expendable Physical Count
- ENNX – Non-Expendable

The VA has been successfully using MSS Software's VistA software applications for many years. With this new version, Microsoft's Windows Mobile Device Center (WMDC) is no longer used. Unique USB file transfer is used instead with KWedge for Android.

Rugged and Precise

The mobile device that is included with the kit combines ruggedness with an integrated high-performance 1D/2D scanning capability. It uses an Android Mobility Edge operating system with a high performance chip set that gives instantaneous results. This unit can withstand multiple 6-foot drops to concrete and is sealed against rain, dust and moisture (IP64). In addition, the backlit keypad is wear-proof, and the touch panel glass is chemically strengthened for extra durability.

Innovative Technology

The slim scanner engine (N6703) has a "laser-like" crosshair aimer that delivers high speed, accurate 1D and 2D barcode reading in any orientation. The battery lasts more than a full shift and powers a bright display that's easily viewed in full sunlight. It also provides quick and reliable data connectivity for uploading large amounts of data. Finally, the VistA Scanner is also ready to accommodate many accessories such as a handle allowing you pistol grip scanning for more accurate barcode reading.

Key Features

- AMES/MERS and GIP Compatible
- Seamless application portability
- Exceptional scanner imager and long-lasting battery life
- Future expansion capability through optional accessories
- Backwards compatible with CK3x Accessories
- USB Data Transfer

How to Order

The VistA Kit includes the mobile computer with preloaded and licensed VISTA Software Programs, Pistol Grip, Battery, Dock, Power Supply, USB Cable, KWedge data transfer utilities and other accessories so you have everything you need to get started right out of the box.
