AGENDA

1. **Welcome**

2. **Mobility Edge™**

3. **Government Certifications**

4. **Impact of Certifications**

5. **Resources Available**

6. **Q&A**

For DoD and government agencies, and our partners serving them, and non-government applications to gain an understanding of and benefit from certifications that Honeywell has recently achieved for mobile computing solutions.

Good Security Benefits Everyone

MOBILITY EDGE™

A Unified Platform For Mobile Computing

CT40/XP   CT60/XP   CN80   CK65   RT10A   VM1A   VM3A
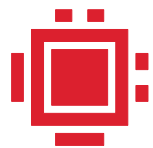

Common HW/SW platform

One OS software image

Common software ecosystem

1st & only guaranteed compatible through A12

Committed to Android 13

Each Android version, no gaps

1st

Reduce cost, effort and risk

Speed time-to-value

Future-proof investment

MOBILITY EDGE™ ANDROID CONTINUITY GUARANTEE

The only way to receive the best available Android security and features is through the latest Android version, NOT through backported patches to prior versions.
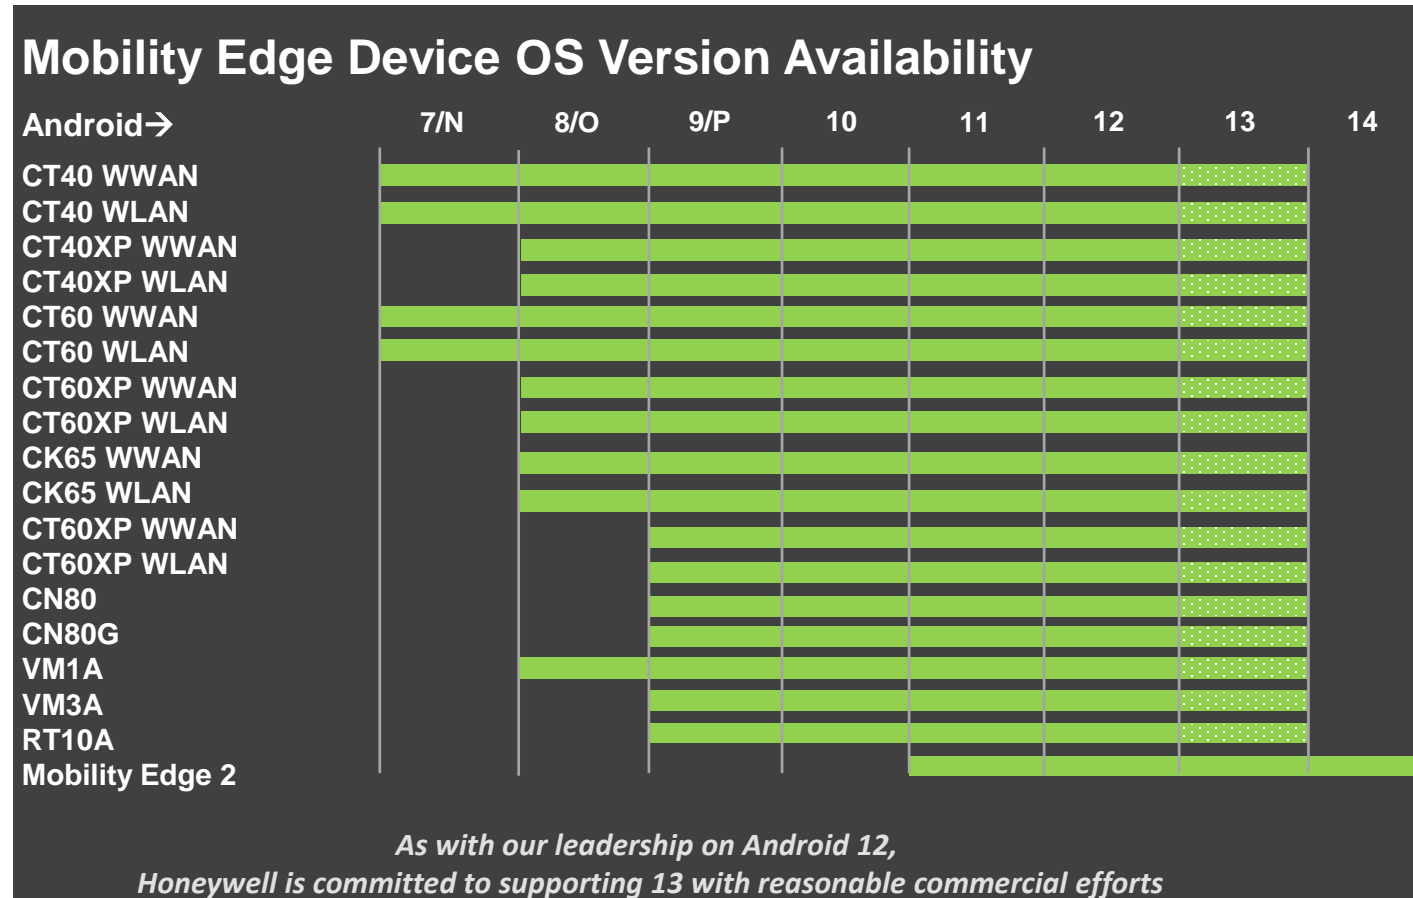

New security features are not backported to prior to Android versions.

Honeywell guarantees.

Other OEMs have skipped versions, only committing and specifying.

$3.9m Avg cost of security breach

As with our leadership on Android 12,
Honeywell is committed to supporting 13 with reasonable commercial efforts

Mobility Edge is the leader in Android version continuity & support
Providing the best available security, features, and lifecycle duration

NIST SP 800-53

Confidentiality

Information Security

Availability

Integrity

Defense-in-dept secure the software, hardware and data

Holistic Security

Assurance testing across devices and services

Continually-evolving

Honeywell Secure Product Development process does not stop with compliance.

**NIST
(National institute of Standards and Technologies)
Special Publication 800-53**

THE JOURNEY TO APL
THIS ISN'T JUST ONE CERTIFICATION

DODIN Approved Products List (APL)

FIPS 140-2 → Common Criteria → NIAP (National Information Assurance Partnership)

✓ Accelerates approvals for use

✓ Certified secure

✓ Meets/exceeds DoD & Federal cyber requirements

Deploy faster with less risk of being blocked due to lack of security
